

Ensure the integrity of your data and increase the health and performance of your IT infrastructure

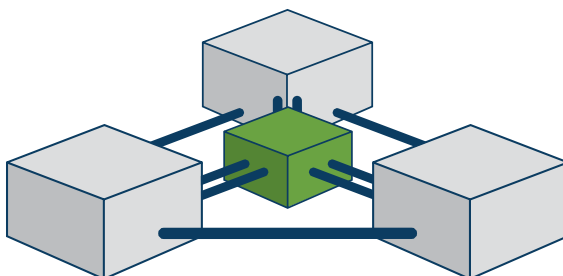

Specifications

- SSAE 16 and PCI audited
- Gramm-Leach-Bliley, Sarbanes-Oxley, HITECH and HIPAA compliant
- Multilayer security including biometrics and video surveillance
- On-site Network Operations Center providing customer support 24x7
- Redundant power (2N), cooling and network with no single point of failure:
 - FM200 clean agent fire suppression
 - Backup pre-action dry pipe sprinkler system
 - Multiple fiber WAN providers
 - Redundant utility power transformers
 - Continuously maintainable infrastructure
 - Fault-tolerant systems

Redundant Network Operations Centers (NOC)

3 locations (with a single point of contact) supporting your business around the clock.

Winston-Salem

Our 140,000-square-foot headquarters is home to two independent data centers (each housed in an atomic blast-resistant bunker), as well as a disaster recovery center that can accommodate more than 1000 displaced workers

Raleigh

Strategically located a few miles outside downtown, our 48,600-square-foot facility was engineered and built to meet DataChambers' rigorous structural requirements and is Category 3 hurricane-rated.

Charlotte

Located on the NC Research Campus, this 50,000-square-foot location is the only purpose-built, commercial data center in the region. The facility features the latest in security, including EyeLock iris recognition technology.
