

Maximize productivity and protect the integrity of your data with colocation and cloud services from DataChambers

## Redundant Network Operations Centers (NOC)

3 locations (with a single point of contact) supporting your business around the clock.

## Colocation

- SSAE 16 and PCI audited
- Gramm-Leach-Bliley, Sarbanes-Oxley, HITECH and HIPAA compliant
- Multilayer security including biometrics and video surveillance
- On-site Network Operations Center providing customer support 24x7
- Redundant power (2N), cooling and network with no single point of failure:
  - FM200 clean agent fire suppression
  - Backup pre-action dry pipe sprinkler system
  - Multiple fiber WAN providers
  - Redundant utility power transformers
  - Continuously maintainable infrastructure
  - Fault-tolerant systems

## IaaS/Cloud

- Customized cloud hosting solutions
- Flexible hybrid options
- Host virtualized infrastructure on dedicated hardware
- Direct connect to colocated devices
- Firewall as a Service (FWaaS)
- Shared resource options
- Web hosting

## Monitoring

- Server/network/application monitoring
- Multiple alert points and policies
- Custom reporting
- Portal-based access

## Management

- Server/network/email management
- Systems and network administration
- Root cause analysis and troubleshooting
- Desktop management
- Help desk management
- End user support

## Backup & Recovery

- Backup administrative team - 24x7 support
- Daily reporting
- Unlimited data and local options available
- Cloud-based recovery options available
- Process optimization

## Business Continuity

- Hot site colocation for primary, secondary, production, DR or multisite
- Recovery seating
- Managed data center infrastructure
- IT support
