

Working around the clock to maximize the uptime of your network and systems

Features

- Server monitoring
- Log monitoring
- Network monitoring
- Backup monitoring
- Hardware monitoring
- Website monitoring
- Email monitoring
- Remote response
- 24X7 rapid response
- Portal-based access
- Custom reporting
- Multiple alert points and policies

Advantages

Health, availability, performance

Monitoring all events within your network and systems and alerting you to any issues, while working to resolve them, before services are impacted

Superior customer service

Reliable administrative experts in multiple locations functioning as an extension of your team around the clock

Improved efficiency of your MIS team

Performing a variety of tasks and activities to free up internal resources

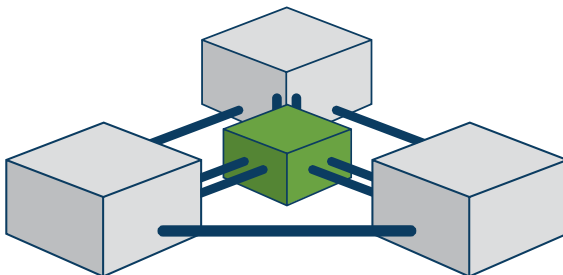

Portal

N-Able™ web-based client portal is an easy-to-navigate dashboard to make reporting faster than ever.

- Active issues
- Open support tickets
- Services affecting system performance
- CPU/RAM usage
- Hard disk usage
- Warranty information

Redundant Network Operations Centers (NOC)

3 locations (with a single point of contact) supporting your business around the clock.

Client Testimonial

“Now we have a highly secure location where we can improve uptime and performance. The deciding factors for us were reduced costs, the security and quality of the data center environment, the professionalism and responsiveness of DataChambers’ team and how easy it is for us to work with them.”

CIO - Charlotte Pipe & Foundry
