

## Colocation and cloud services minutes from downtown

### SIZE

- **Total building:** Approximately 48,600 sq. ft.
- **Raised floor:** Approximately 30,000 sq. ft. of 36" raised floor (for shared or private data centers) at full build-out. Clear ceiling height 12'
- **Features:** Standard loading dock space and secure mechanical and electrical areas

### POWER

- **Total power:** Fully redundant for a total of 6.0 mW
- **Generator:** Redundant 1.5 MW Cummins/Onan with 6,000 gallons of fuel on site
- **UPS:** Mitsubishi 750kVA units implemented in redundant pairs (2N configuration)
- **Main switch gear:** Zenith Energy Systems implemented in a redundant pair (2N + configuration)
- **2N-Redundancy:** All power implemented in at least a 2N configuration and designed for continuous maintainability

### COOLING

- **Equipment manufacturer:** Stulz CyberAIR split systems with advanced EC fan design for the data center. Liebert Deluxe System for the electrical rooms. Capacity to add the necessary cooling to serve future expansion

### SECURITY

- **Hardening:** Surrounded by perimeter fencing, bollards, guard rail and security cameras. Designed to withstand Category 3 hurricanes winds in excess of 160 mph.
- **Access:** By escort only, as authorized by customer-defined access control list. Doors are secured with proximity card readers, which are augmented to require either a pin code or biometric validation.
- **Man traps:** Between the outside building perimeter and the data center floor there are multiple layers that require dual authentication.
- **Biometric:** Palm scans used to augment proximity card security at multiple points within the facility.
- **Surveillance:** Over 40 cameras that monitor all activities on both the exterior and interior of the building. All security cameras are continually monitored via our 24x7 Network Operations Center, and recorded data is kept for a minimum of 90 days.
- **Fire protection:** FM200 and Dual Action Dry Pipe system.

### CARRIER HOTEL

- **Carriers:** Dedicated points of presence with: AT&T, CenturyLink, Charter Communications, Level3, Lightower - Carrier hotel built to accommodate several additional carriers
- **Bandwidth:** Provided via a minimum of 3 carriers using BGP
